Motivated and detail-oriented Full-Stack Software Engineer with experience building responsive, scalable web applications using React, Node.js, Express, and MongoDB. Passionate about solving real-world problems and contributing to collaborative development teams. Eager to join a mission-driven company and grow as a developer.

Technical Skills

JavaScript | HTML | CSS | Python | React | Redux | Bootstrap | jQuery | Node.js, Express.js | MongoDB | SQL | GitHub | Heroku | Netlify | Vite | REST APIs | JWT Auth | OAuth 2.0 | Agile

Technical Projects

Soothing Baby App

Designed and implemented a calming tool for new parents using React, Vite, and Node.js, integrating GIPHY and Spotify APIs.

- Built a responsive UI with local Storage-based timers and user preferences.
- Deployed frontend on Netlify and backend on Google Cloud VM with PM2 and NGINX.
- Collaborated on feature planning and iteration using real feedback.

WTWR (What To Wear)

Engineered a full-stack weather-based wardrobe planner.

- Implemented JWT authentication and protected routes with Express and React Router.
- Integrated OpenWeatherMap API and filtered clothing items dynamically.

E-Commerce Store

Developed a full-stack store with Stripe payment integration.

- Built shopping cart logic, role-based access control, and secure checkout.
- Deployed on Heroku and Netlify with CI/CD pipelines via GitHub Actions.

Education

TripleTen Bootcamp – Certificate in Full-Stack Web Development

Completed: May 2025

Completed over 1,000 hours of hands-on training in full-stack development, focusing on building scalable web applications using React, Node.js, Express, and MongoDB.

Applied Agile methodologies, including sprints, Git branching, and code reviews.
